43 Years of Great Roofs

Design / Install

- Roofing... all major brands
- Sheet Metal
- Flat & Tapered Insulation
- Metal Roof Restoration
- For:
- Industrial Buildings
- Warehouses
- Schools

The most exciting aspect of installing unique **CUSTOFOAM** roofs on our clients facilities is the **key relationships** that are also cemented between our staff and yours.

Long term commitments to service are integral to the long life of the extensive list of roofs that are still serving needs well beyond 20 years. No other firm in the upper Midwest can show you photos of as **many 20+ year roofs** as **CUSTOFOAM**

Ingenuity with purpose in roofing is a pillar of our long term success. Custof foam pioneered **fleece-backed roof systems** in the upper Midwest. These highly durable and tough roof membranes marry themselves to the roof insulation or substrate by way of several types of patented adhesives. Our adhesives do not release harmful solvents into our atmosphere. Besides being exceptionally **GREEN**, these two-component adhesive formulations have **exceeded the most demanding wind uplift tests that Factory Mutual Insurance has ever conducted.**

The **experience and versatility** of our roofer teams allows us to solve your roof problem with the right product and the right application technique. **Call CUSTOFOAM today to have an experienced roofer look at your roof.**
